

## A FRAME WORK OF CREATIVITY

Contoura is the progressive approach to counter design from the people who brought you ZGuard Food Shields. What ZGuard did for sneeze guards, Contoura does for counters.

With technology-driven construction methods, it is now possible to create custom style counters without all the hassles.

Contoura puts the design back in designer. By liberating you from the mundane details of counter construction, you are able to focus on the aesthetics and functional aspects – not construction techniques. Configure, reconfigure and experiment with bold choices not boring details..

Contoura lets you interpret your vision into a component system without losing any details or style in translation. You get exactly what you want the way you want it without the unwanted surprises associated with traditional counter fabrication.

Contoura can easily go from tech to traditional by your choice of finishes. This chameleon like performance makes it perfectly suited for any environment.

## A BETTER WAY TO BUILD

When you consider how much raw material is required just to support the enormous weights required for today's food service counters, you can see why there is little money left for bold and expressive design. Now with Contoura, more budget is available for upgraded finishes and thoughtful design.

With Contoura's approach, the support is built in. By using steel, aluminum and ingenious construction techniques we eliminated tons of material. We edited out unnecessary shelves, utility walls and made many internal supports redundant – all this without sacrificing strength or style.

### FASTER

Create your project in a fraction of the time. Now the most complicated part of the process may be deciding the finishes. Get drawings and approvals quicker and enjoy shorter fabrication lead times.

### BETTER

Because the process is a component format, pieces fit better. Measurements are more precise and finishes are more easily matched and controlled from start to finish. Corners are tighter, lines are straighter and curves are more exact.

### SUPERIOR

Our quality shows by using superior materials, insisting on precision fit and quality finishing. Attention to detail, craftsmanship and construction ensure every counter meets the highest standards – yours.

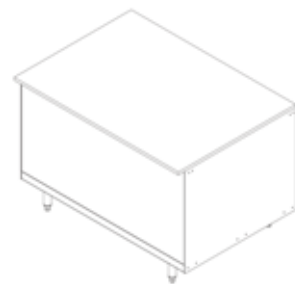

### SMARTER

Contoura makes it easier to design, easier to build, easier to install and easier to modify. There is no need for utility walls. There are no more paper templates to lay out. Imprecise field measurements won't ruin a project. From start to finish, the flexibility of Contoura makes it the smart choice.

## SHAPE UP

As the single largest piece of “furnishing” in any environment, we understand the impact and importance of the aesthetics.

That’s why we developed several “quick ship” designs that can be finished in an almost endless selection of colors, materials and finishes. Add functional storage solutions and decorative enhancements to customize your project for a signature look. All designs can be specified to any length. Add plate shelves, a variety of tray slides or use an integrated counter/slide. Specify curb style, feet or casters.

### CURVES

Gentle curves or a tight radius it doesn't matter and its easier than ever. The Contoura system gives you real curves at any radius you determine—all for about the same price as a right angle. We are not talking about segmented counters with curved tops either. Real curves that make a real statement

### CORNERS

Use your corners to their full potential. Too often corners become a wasted space. Our integrated corner transition units tie seamlessly into the look of the counter while providing multiple storage options without breaking the budget.

### TRADITIONAL

Get limitless design possibilities with the work horse of our catalog collection. Choose any length—and we mean any length—if you need a counter exactly 14' 5/8" we can do it. Add a host of options and finishes to make this the corner stone of your next project and no one will know it's not custom.

### ANGLES

A slight tilt is often all that is required to gain a new perspective on design. The beauty of this design lies in the simplicity of the lines. Add plate shelves or tray slides.

### MORE CURVES

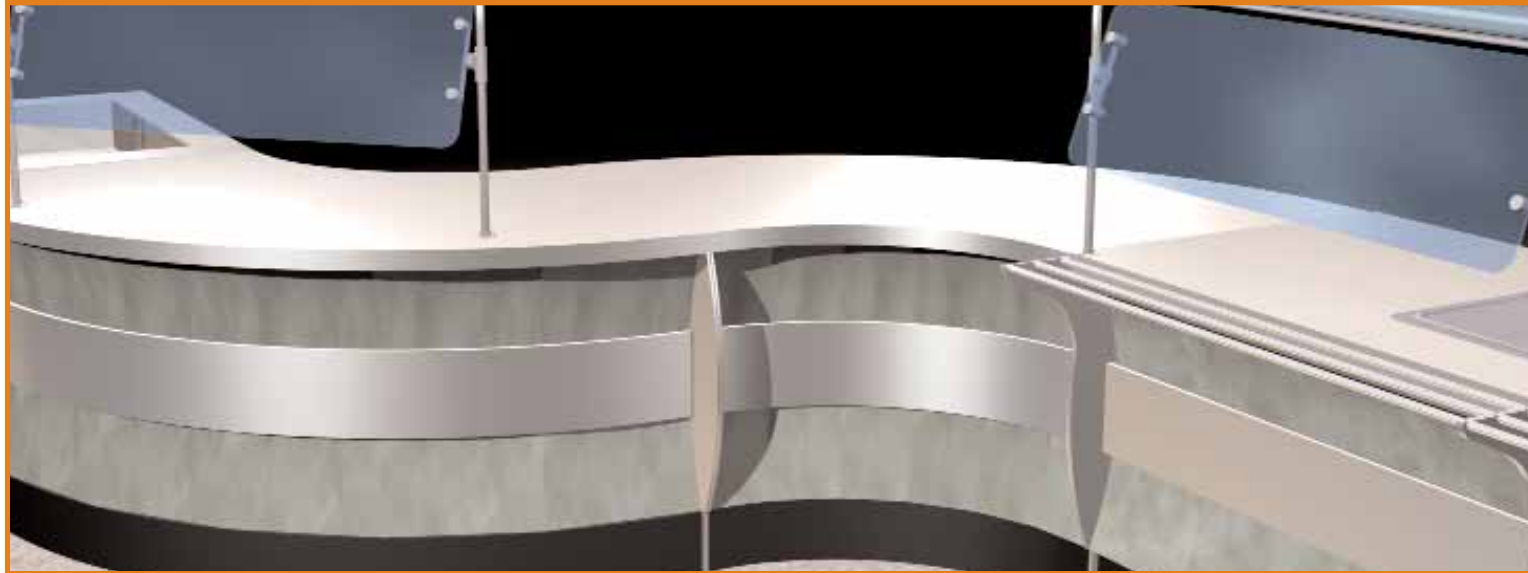

This streamlined unique design is a blank canvas waiting for you to express your vision. The classic curves allow you go from from stark and modern to transitional or classic.

### CUSTOM

If you have a vision, we have a solution. From concept to reality we can take nearly any of our signature designs and reinterpret it into an Contoura Counter.

## THE CONTOURA ADVANTAGE

- SHORTER DESIGN TIME
- LESS DRAWING TIME
- SHORTER LEAD TIME
- LESS APPROVAL TIME
- EASIER TO SPECIFY
- BETTER QUALITY PRODUCT
- MORE ROOM TO UPGRADE FINISHES
- SAVE ON CONTRACTOR TIME
- SAVE ON INSTALLATION TIME
- SAVE ON CONSTRUCTION MATERIAL
- SAVE ON THE LACK OF HALF WALLS
- SAVE ON ANY LAST MINUTE CHANGES
- SAVE ON RENOVATION COSTS
- EASY TO CHANGE LOOKS OR STYLE
- NSF LISTED

## THE BIG FINISH

With countless finishes, your style will never get lost in the monotony of modular design. And because of the assembly process, you're guaranteed a better fit and finish on all of the details that make a difference.

### COUNTER TOPS

Granite  
Solid Surface  
Laminates  
Stainless Steel

### PANELS

Hard Woods  
Veneers  
Plastics  
Laminates  
Stainless Steel  
Powder Coated

## MANEUVER CURVES WITHOUT SLOWING DOWN

Curves. Everyone wants them. However in the past, the cost and time involved in the design, fabrication and installation made curves cost prohibitive in most cases.

With Contoura's avant-guard construction design, cost-effective curves and serpentine shapes now come as easily as right angles.

Big curves, small curves, free-standing serving pods - are all available on the most humble of projects. Little additional cost. No additional drawing time. No complicated utility walls.

Now there's no reason to slow down for curves.

### SHELVES

Add storage shelves, plate shelves, or decorative displays from glass, stone, or wood. Nearly any details that you would include on a custom project can be incorporated into Contoura.

### DRAWERS

Using high quality slides and supports we can include drawers into your next Contoura project. Rolled edge door faces and a wide variety of hardware lets you give Contoura counters another level of customization.

### LIGHTS

Use halogen, fluorescent or strip lights to make your Contoura project really shine. Since the structure already supports wiring chases, feel free to shed some light on your style.

### TRAY SLIDES

Choose from one of our unique slides or create your own. The choice is still yours.

## TAKE THE CHALLENGE

We are so sure that once you see how easy it is to design with Contoura, and once you see all the benefits from start to finish you may never want to go back to custom again. We invite you to send us your latest project and let us show you how it can be turned into an Contoura Counter with little effort. Your style. Your signature. Our technology. It's the perfect combination.
